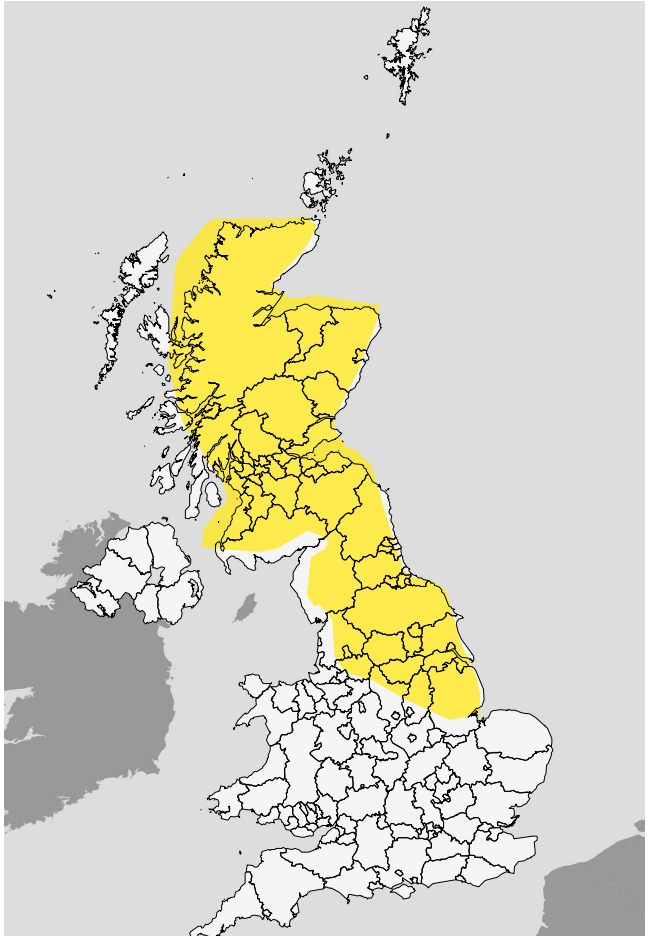
Yellow warning
Ice

Between
21:00 Sat 13 Feb 2021 and
21:00 Sun 14 Feb 2021



Treacherous ice may develop, at least in a few places, following freezing rain. Where it occurs, significant disruption is possible.

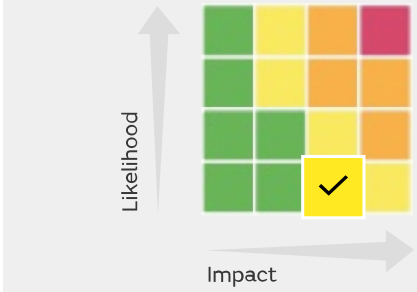
What to expect

- There is a chance that dangerous driving conditions may occur in at least a few places, leading to road traffic collisions, road closures and longer journey times by public and private transport.
- A small chance of injuries from slips and falls on icy surfaces.
- A small chance that untreated pavements and cycle paths may quickly become treacherous and possibly impassable.

Further details

Sporadic snowfall, mainly over higher ground of Scotland at first, may increasingly turn to freezing rain overnight Saturday into Sunday, whilst moving eastwards and expanding across other parts of Scotland and Northern England. This freezing rain is likely to be quite localised, but where it does occur will rapidly cause icy and and somewhat treacherous stretches on roads and pavements.

There is very low confidence in how extensive this freezing rain will be, although it is likely to fall in at least a few places within this warning area.



Very low likelihood of medium impacts

Yellow warning
Ice

Between
21:00 Sat 13 Feb 2021 and
21:00 Sun 14 Feb 2021

Further Details (continued)

There is a small chance that it could become more widespread through the course of Sunday morning, especially across Scotland. Milder air will steadily arrive from the west during Sunday daytime, slowly confining the ice risk further east and south through the day, and mainly to higher ground.
